LEGAL DISCLAIMER

Our hanging organizer was built with a universal design that fits most strollers securely; however, it does not function as intended on every stroller and may have not been tested on brand new models. At Oliver & Eve, we understand that the most important aspect of your organizer is how well it secures to your stroller, so we designed it carefully to fit securely on most popular handlebars.

Please refer to pages 9, 10, & 11 for information on how to install your organizer. Strollers and travel systems commonly known to be a mismatch for our product include ALL Babyzen brand strollers, Nuna travel systems, as well as the Vista and Cruz models by Uppababy. They're nice strollers, but they don't always play well with our organizer.

If you find installation challenging, use Amazon's **Ask a Question** button on our Seller page (can be located from Orders screen) to message us and we'll be glad to help.

Always exercise caution while installing and in use, especially if traveling with beverages considering the hanging nature of the organizer. Always double-check for a secure installation, that lids are secured, and accidental spills aren't likely to occur before use.

THANK YOU!

A Note from the Founder & Owner of Oliver & Eve...

Oliver & Eve is a family owned and operated business. Your purchase of this organizer isn't going to help some CEO buy another sports car or fancy vacation home. You're helping a little boy get his sports gear, a little girl to get dance lessons, and HELPING PARENTS like us put food on the table!

We created this organizer out of necessity. After raising a child for ten years, my wife, Allyson and I decided to continue to grow our family. In those ten years, SO many products have changed parenting a baby and made it easier, but the common problem of having functional, easy-to-access storage space on a stroller hasn't changed AT ALL.

Frustrated with the many stroller options out there, but little options of high-quality, smartly designed organizers, we decided to take to the drawing board and create the SMARTEST Universal Stroller Organizer we could think of. We started with a common layout and continued to add feature after feature until we were happy to use the product ourselves as parents of our newborn baby girl.

We now have a second baby girl on the way and are excited to offer our organizer to other parents to help make their lives just a bit easier, too!

From the bottom of our hearts,

A large, handwritten-style graphic that says "Thank you so much!!!" in a light, cursive font, tilted diagonally across the page.

We TRULY appreciate your business,

Nathan & Allyson Ross

MAINTAINING YOUR ORGANIZER

How to Keep Your Organizer Squeaky Clean & Lookin' New!

Your organizer is made with durable polyester material that's treated with a non-toxic waterproof coating. It's been hand-crafted and made with high-quality craftsmanship.

Here are A FEW TIPS to easily clean your organizer and keep it looking new:

- **Most Times You Just Need A Wipe to Clean It.** We designed this organizer so that cleaning is made simple. The waterproofing should prevent accidental stains. Just pull out another one of the million wipes you'll use while raising your baby and take it to the organizer. It should sparkle like new in no time.
- **Hand Wash for Full Cleanings.** If your organizer is thoroughly soiled inside and out, and needs a full cleaning, we recommend hand washing with a tiny amount of all-purpose detergent and hanging to dry.
- **The Main Compartment Turns Inside-Out.** That's right. You can simply pull on the bottom of the main compartment, turn it all upside down, and shake the Cheerios and other debris out of the bottom of your organizer. This may be a good time to give it a quick wipe, too, if you see any residue.
- **Store Wet & Soiled Stuff in the Expandable Bag.** The expandable bag is built with breathable mesh. If you find yourself holding a spit up rag or dripping wet shirt from a day at the beach, store that stuff in the expandable mesh bag, not the main compartment. It's much easier to rinse off the breathable mesh than it is to wash a funky smell out of your organizer.
- **The Organizer Stores Flat.** When not installed or in use, store your organizer by flattening it from the front to the back vs. flattening from the top-down. This will keep the zip-off pouch and face of the bag looking nice and allows for the smallest profile during storage.

***Please note:** The cupholders can turn inside-out, which may warp the shape of the insulation that lines the cup holders if carelessly handled. These cup holders keep your sanity in the form of coffee and other beverages. Please EXERCISE CAUTION and care if you decide to turn them inside out for cleaning, which we only recommend in extreme cases, and may void your warranty.*

SECURING THE EXPANDABLE MESH BAG

Easily Tie Down the Hanging Expandable Bag to Your Stroller

Your organizer is equipped with two (2) optional tie down Velcro straps to help you quickly and easily secure it and its contents to your stroller. No more swinging bags spilling drinks!

HOW TO QUICKLY FOLD UP THE EXPANDABLE MESH BAG

Keep the Extra Bag Out of Sight Until Ready for Use!

TIP: Folding up the expandable mesh bag also keeps items in the slip pocket hidden from sight.

Step 1

Lay out the expandable mesh bag, taking note of the two Velcro strips

Step 3

Fold up the stroller body straps and secure together with Velcro loop.

Step 2

Fold the mesh bag up, attaching the SMALL Velcro seam to the LARGE seam. Then lay the remaining part of the bag flap to the top of the organizer.

Step 4

Fold the remaining flap of the bag down and attach the last remaining Velcro strips. You're ready to go!

ADJUSTING THE VELCRO STRAPS FOR A PERFECT FIT

Discover the Many Ways to Use the Velcro Strap for a Secure Installation

Our organizer was designed to fit most strollers with heavy-duty Velcro that can support the weight of the organizer and its contents, EVEN if all the Velcro isn't used to secure it to handlebars.

There are a few simple techniques that can be used when attaching the straps to your stroller, which we'll describe below. A combination of these techniques may provide the best fit for your specific stroller model. If you're not comfortable with the fit you're getting and require assistance, please contact us via your Amazon Order History. We'd be glad to help. 😊

Strap to Strap

Loop the strap around the stroller's handlebar, attaching the strap back ONTO ITSELF (vs. on the body of the organizer). Finish by creating a seal around the handlebar and remaining portions of Velcro.

Loop Around Angle

Loop the strap around the stroller's handlebar, attaching the strap back onto itself, but with the top flap **ON AN ANGLE**, with the top flap facing either away or towards you. Finish by creating a seal around the handlebar and remaining portions of Velcro.

NOTE: If organizer installs in a tilt position, try decreasing the amount of Velcro (above/below right) to adjust the angle, being sure there is a seal remaining around the handlebar.

Strap to Body of Organizer

Loop the strap around the stroller's handlebar, attaching the strap TO THE BODY of the organizer. Finish by creating a seal around the handlebar and remaining portions of Velcro.

FITTING GUIDE: THE 3 APPROACHES

Choose the Best Option for Fitting the Organizer to Your Stroller

There are 3 different options for attaching the organizer to your stroller's handlebars. Please Note, a combination of these methods may prove to provide the best, most secure fit.

OPTION 1 – CURVE OF HANDLEBAR (Most Common)

Securely attach Velcro straps to the curved part of the handlebar

OPTION 2 – FRONT OF HANDLEBAR

Securely attach Velcro straps on the front of handlebar (or about ½ to front and ½ to curve)

OPTION 3 – SIDES OF HANDLEBAR

Securely attach Velcro straps on the sides of the handlebar (or about ½ to curve and ½ to sides)

NEED HELP?

Contact Us for Fast Customer Service!

We guarantee your satisfaction, and we mean it. If for any reason you have any issue with your product, or if you're having an issue fitting your organizer to your specific stroller, please contact us via Amazon.

Just click on our seller name (found in your Order History) and click the *Ask A Question* button. We'll provide you with a response in 24 hours or less:

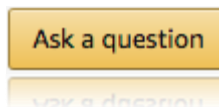

Step 1

Locate our **seller name** via the product listing, found by searching for our product or looking in your order history. Click on our seller name.

Step 2

Click the **Ask a question** button. Use the form to provide us with a full description of your issue. If you need help with fitting your organizer, please be sure to provide us with your stroller make and model.

Step 3

Sit back and wait! Help is on the way!

ONE QUICK QUESTION...

Happy?

Then we are, too! We'd be very grateful if you could share your experience

As a small business, your reviews are key to our success, and it helps other parents discover our products and make their lives a little easier, too!

PLEASE Consider Leaving Us A Review on Amazon or Google Today!

Thank you!
